30B Kock Street Eastend Rustenburg

Objective

Highly motivated and detail-oriented self-taught frontend developer with [number] years of experience in building responsive, scalable, and maintainable web applications using HTML, CSS, JavaScript, and various frameworks/libraries. Proficient in creating reusable UI components, optimizing page load times, and ensuring cross-browser compatibility. To obtain a challenging and creative frontend development position that utilizes my skills and experience to build innovative, user-friendly, and high-performance web applications. I aim to leverage my passion for coding, problem-solving, and continuous learning to contribute to a dynamic team and drive business growth.

Experience

Freelance Frontend Developer (2023-Present)

- Built and delivered multiple web applications for clients using HTML, CSS, JavaScript, and React
- Collaborated with clients to understand their requirements and preferences
- Designed and implemented responsive, mobile-friendly UI components
- Optimized page load times and improved overall performance
- Managed version control using Git and GitHub

Personal Projects:

- E-commerce App: A responsive e-commerce website built using Vanilla JavaScript, HTML5, and CSS3
- [Food App]: A weather app built using React and Redux
- [Quiz App]: A portfolio website built using JavaScript, CSS, and HTML
